Activities/operations

Development, production and sales of starch and other agriculture-based ingredients, for the food industry in particular.

Products

KMC turns sustainable potatoes into innovative and cost-effective ingredients for the global food industry. Our portfolio includes application-specific solutions, potato protein, modified starches, native potato starch as well as potato granules & flakes.

Services

At KMC Food Innovation Center, we have our own state-of-the-art pilot facilities where we can simulate various food production processes. We work closely with our customers and can act as their development partner reducing their time to market.

Our non-GMO and non-allergenic products fit well with plant-based and free-from food trends.

Responsible business

KMC prioritizes sustainable production and possible impact on the environment and we are committed to the preservation of a healthy environment. Our wastewater treatment is state-of-the-art, using the latest techniques to remove waste from the water and return it to a clean state.
